

Chakral Profile of Coronavirus Omicron Variant¹ **Notable Difference from Coronavirus Delta Variant**

1. Pranic Congestion is not as severe in *omicron vs delta* variants
2. Minor Chakras are notably overactivated and congested
(*back head minor, jaw minor, throat minor, arms & legs minor chakras*)
3. Meng Mein Chakra is invariably overactivated and congested
4. Kidneys are invariably overactivated and congested
5. Adrenals are invariably overactivated and congested
6. Pineal gland not congested in *omicron vs delta* variants
7. Lungs are invariably not congested in *omicron vs delta* variants

Severity of Symptoms May Reflect Severity of Illness **Pranic Healing is Easier with Omicron vs Delta Variant**

Guidelines for the Pranic Healing Protocol for Coronavirus Omicron Variant¹

1. Scan the chakral profile of client.
2. Inquire the presentation of symptoms & vaccination status.
3. Use light green prana in mild cases
4. Use medium green prana in moderate to severe cases
5. Clean with light green prana the overactivated and congested minor chakras
(*back head minor, jaw minor, throat minor, arms & legs minor*)
6. Energize the minor chakras with light green prana and energize with gold prana
7. Clean the back head minor chakra with light whitish green prana and if overactivated, inhibit with gold prana.
8. Clean the meng mein chakra with light whitish green prana and if overactivated, inhibit with gold prana.
9. Clean and energize the kidneys with light green prana.
10. Clean and energize the adrenals with light whitish green prana
11. No treatment required on the pineal gland.
12. Apply energetic shielding

May need to continue Pranic Healing in some patients for 2-3 weeks for residual symptoms
